

# LIQUID NANOTINT®

## HIGHLY TRANSPARENT SOLAR CONTROL COATING FOR GLASS

### Boosting Efficiency

Are you an owner or manager of commercial, institutional buildings, retail space, hospitality, or office buildings?

DryWired Liquid NanoTint®(LNT) is a solar control glass coating that allows you to increase energy efficiency and optimize savings by reducing the consumption of air conditioning in the summer and heating in the winter.

**Easily Applied by  
Liquid NanoTint®  
Certified Installers**

### Why Liquid NanoTint?

Our highly-transparent solar control coating :

- Transforms your existing single and double pane windows into energy efficient ones
- Allow for maximum natural light to enter
- Has a payback period within 3-5 years
- Easy application
- Does not crack, bubble or peel
- 15 year limited warranty

Testing shows an average room temperature reduction of 3-5°F.

**99%**  
OF UVA/UVB  
BLOCKED

TANCE

### Key Features & Benefits

**INCREASES  
ENERGY EFFICIENCY**

**BOOST THERMAL  
COMFORT**

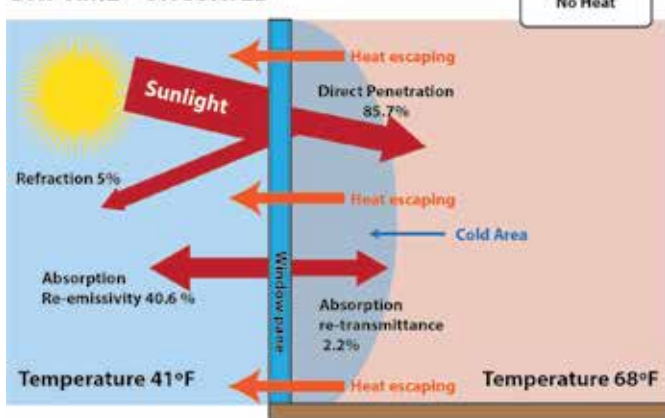

**BOOST UV  
PROTECTION**

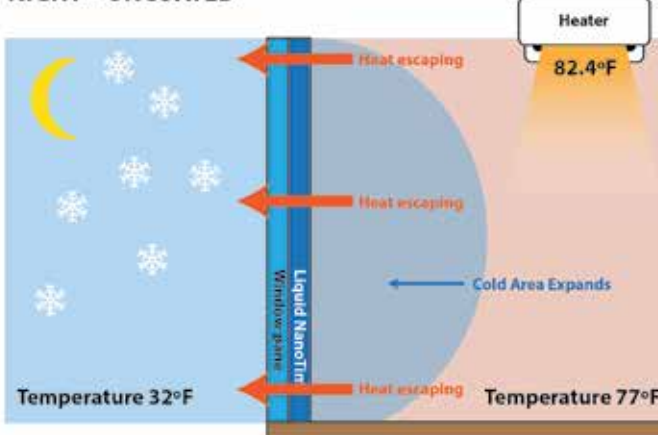

**MAXIMIZE  
VISIBLE LIGHT**

DAY TIME – UNCOATED

During the day, solar heat is absorbed by the coating which prevents 75% of the heat from escaping.

NIGHT – UNCOATED

At night, heat is absorbed by the coating which prevents 75% of the heat from escaping.
